

# Heatlight HEATING SOLUTIONS

## HEATLIGHT HALOGEN

HEATLIGHT Halogen has been developed to meet the requirements of today's needs for outdoor heating. The heater is weatherproofed and is suitable to be used outdoors in any application. Unlike other outdoor products this heater has very low glare and users feel warm and comfortable from switch-on.

The HEATLIGHT Halogen is offered with a choice of short wave infrared lamps of either gold or satin NDA type.

# HEATLIGHT HALOGEN

Quartz halogen infrared lamps give instant radiant heat. The reflector helps to maximise the direction of heat output and optimizes spread. This unique feature warms the surface of the skin, much like the sun, and not heating the air in-between. It heats surfaces quickly and efficiently, making it as energy saving as possible.

The HEATLIGHT Halogen series are designed to be perfectly safe in the rain and continues to work even when subject to intense water jets. The unit has compact dimensions, robust character with excellent design, making it ideal for both commercial and domestic applications. It is fitted with an attractive stainless finger guard to protect against potential hazard. The HEATLIGHT brand is unique in that both the heaters and the lamps are manufactured by us, resulting in the best quality solution and complete engineering compatibility.

The HEATLIGHT Halogen series has been designed to optimize energy consumption and power output. The secret lies in the relationship between lamp and reflector and it is in this area where the HEATLIGHT Halogen excels. The combination of clever heat handling design and the energy efficient benefits of infrared make this heater range unbeatable.

## Product specification

### HLW technical chart

Product ordering no	Unit features		Load rating		Current rating AMPS		Dimensions	
	Colour options	Lamp type	No. of lamps	Wattage	240V S phase	415V+ N 3 phase + N	Size	Weight
HLW10	White	NDA	1   1.5 kW	1500	6.25	-	480 W x 120 H x 120 D mm	1.7Kg
HLW15	White/silver/black	Gold/NDA	1   1.5 kW	1500	6.25	-	480 W x 120 H x 120 D mm	1.7Kg

### Cover area

Product ordering no	Wall mounted - Using brackets provided and mounting the HEATLIGHT unit on the wall at an angle. There must be sufficient free space above the heater at all times.		Overhead mounted - Placed vertically and mounted directly on the ceiling or by chain. There must be sufficient free space above the heater at all times.	
	Height from the floor	Average area covered	Height from the floor	Average area covered
HLW15	2m	7.6m <sup>2</sup>	2m	9m <sup>2</sup>
HLW15	2.5m	12.3m <sup>2</sup>	2.5m	16.8m <sup>2</sup>

## Lamps

The HEATLIGHT Halogen can be fitted with either gold lamps or satin NDA lamps. The gold lamp is the result of extensive research and development. It gives a pleasant gold colour when switched off and a pink colour when switched on. The satin NDA lamp gives a unique warm colour when switched on with low glare. The lamp life is approximately 7,000 hours and would therefore be changed very rarely. Please contact us for necessary replacement lamps.

## HEATLIGHT HALOGEN range

- Superb zone heating reflector design
- Wall mounting bracket supplied as standard
- Fixings to a parasol or awning are available as extra accessories
- Overhead mounting options:
  - Suspended overhead by chains or fixed
- Suitable for both indoor and outdoor installations
- Selection of black, white or silver casing colours

## HEATLIGHT accessories

Accessories to optimize installations:

- PIR movement detectors
- Timers
- Dimmers
- Parasol arm option

## Parasol Arm

An arm for mounting to a professional parasol. This arm allows the heater to be mounted to the centre flange of parasols. With a simple lift and twist action the heater can be lowered to the centre pole enabling the parasol to be shut without the need to remove the heaters first. Usually three or four arms and heaters per parasol
